# Condition #1

List 4 mobile phone products in the main section as shown. You must use `Grid`.
The width size of grid layout is `980px`.
Set the empty space between grid items (purple space) and the size of grid items so as not to damage the maximum size of the grid layout.

# Condition #2

the maximum width size of website is `1060px`.

# Condition #3

If the user browser's width size is less than `1060px` such as mobile browser,
the grid layout should respond as shown in the figure below.
Hint, use the `@media` query
